Adam Joiner  
Vice President  
Joiner Construction

Dear Adam Joiner,

This letter is to thank you on the great job Joiner Construction has done at our facility. The scope of work included all civil work, a 25' wide x 192' long lean to addition, concrete slab, electrical, retainer wall, sidewalks, and steps per prints and specs. The civil work included: cut and remove trees and brush along the East drainage ditch for approximately 250', install rip-rap along the creek bank and where needed, erosion control, construct building pad, install 18" RCP to carry the storm water from the ditch along South Field Drive, install 4" of compacted dense grade base for driveway beside the new building and the entire truck dock area, construct a temporary road where the existing drive was, final grade, seed and mulch disturbed areas. The total contract amount for this project was \$239,491.00. Thank you once again for the great job and I look forward to doing business with Joiner Construction in the future.

Sincerely,

A handwritten signature in black ink that reads "Roger Minor". The signature is written in a cursive, flowing style.

Roger Minor
